Introduction to Psychology

Syllabus

Day	Course material	Lab	Readings
1	Welcome and introduction Learning objectives Foundational psychological theories. Psychodynamics theory Behaviorist theory Have a general understanding of these main subfields of psychology:	Capstone project introduction Introduction to R The Humanity X dataset.	
2	Research methods and critical thinking	Study design	Psychological Science, Chapter 2
	Learning objectivesWhat is the scientific method?		Quiz 1 (Complete before the class)
	 Outline the five steps of the scientific method What makes a statement a hypothesis? How does one operationalize a concept? 		Open Science Collaboration. (2015). Estimating the reproducibility of psychological science. Science (If you don't have time, you can simply read
	 Observational, correlational, and experimental research 		the first page which is a summary of the study.)

• How are experimental and control groups differ? • Why can we not use correlational data to provide evidence for cause-effect relationships? Psychological disorders Data description 3 Psychological Science, Chapter 14 Learning objectives • Introduce the DSM-5 diagnostic and classification system for mental disorders. Chwyl, C., Chen, P., & Zaki, J. (2020). Beliefs About Self-Compassion: Implications for • Discuss the criteria used to differentiate Coping and Self-Improvement. Personality and normal from abnormal behavior. Social Psychology Bulletin, 0146167220965303. Introduce and give examples of various types of mental disorders including depression, obsessive-compulsive disorder, anxiety disorders. • Introduce common personality disorders. Discuss the usefulness of DSM-5 in making treatment decisions. Guest lecture: Being a therapist in the U.S. -Jungkeun Kim Experimental Psychological Science, Chapter 3 Brain & the mind 4 design Learning objectives Schwartz, S. J., Lilienfeld, S. O., Meca, A., & Sauvigné, K. C. (2016). The role of neuroscience • Basic introduction to brain anatomy. within psychology: A call for inclusiveness over • Identify parts of a neuron: how do neurons exclusiveness. American Psychologist communicate?

- Discuss the crucial functions handled by the brainstem.
- Introduce the functions of the frontal, parietal, occipital, and temporal lobes.
- Introduce the tools we use to study brain function.

Bennet, C., Baird, A., Miller, M., & Wolford, G. (2010). Neural correlates of interspecies perspective taking in the post-mortem Atlantic salmon: An argument for proper multiple comparisons correction. *Journal of Serendipitous and Unexpected Results*

Bonus reading

Jonas, E., & Kording, K. P. (2017). Could a neuroscientist understand a microprocessor?. PLoS computational biology, 13(1), e1005268.

5 Learning

Learning objectives

- Describe the processes of classical conditioning
- How does extinction occur during classical conditioning?
- Outline the factors that influence classical conditioning.
- What are the differences of positive and negative reinforcements?
- Describe the process of observational learning as demonstrated by Bandura's experiments and discuss the impact of antisocial and prosocial modeling.
- How are mirror neurons related to observational learning?

Capstone project idea generation

Zaki, J., Kallman, S., Wimmer, G. E., Ochsner, K., & Shohamy, D. (2016). Social cognition as reinforcement learning: feedback modulates emotion inference. Journal of Cognitive Neuroscience

Brennan, C., & Proekt, A. (2019). A quantitative model of conserved macroscopic dynamics predicts future motor commands. *Elife*

Bonus reading

Neftci, E. O., & Averbeck, B. B. (2019). Reinforcement learning in artificial and biological systems. *Nature Machine Intelligence*

Guest lecture: What can we learn about the brain from artificial agents. – Connor Brennan (University of Pennsylvania)		
Human development Learning objectives	Capstone project design	R Pei, EC Kranzler, AB Suleiman, EB Falk (2019). Promoting adolescent health: insights from developmental and communication neuroscience. <i>Behavioural Public Policy</i>
 children think? Introduce Harlow's research regarding maternal deprivation and attachment in monkeys. Introduce the characteristics of Piaget's stages of development. 		Reiter, A. M., Moutoussis, M., Vanes, L., Kievit, R., Bullmore, E. T., Goodyer, I. M., & Dolan, R. J. (2021). Preference uncertainty accounts for developmental effects on susceptibility to peer influence in adolescence. <i>Nature Communications</i>
 Review Erikson's stages of psychosocial development, particularly those related to adolescence, middle age, and later adulthood. Outline neural, cognitive, and social changes associated with adolescence. 		Chein, J., Albert, D., O'Brien, L., Uckert, K., & Steinberg, L. (2011). Peers increase adolescent risk taking by enhancing activity in the brain's reward circuitry. <i>Developmental science</i>
Personality Learning objectives Outline approaches to personality assessment and discuss the reliability and validity of each approach.	Multivariate regression	Rothmann, S., & Coetzer, E. P. (2003). The big five personality dimensions and job performance. <i>Journal of Industrial Psychology</i> Wilson, A. E., & Ross, M. (2001). From chump to champ: People's appraisals of their earlier
	from artificial agents. – Connor Brennan (University of Pennsylvania) Human development Learning objectives How do we understand how infants and children think? Introduce Harlow's research regarding maternal deprivation and attachment in monkeys. Introduce the characteristics of Piaget's stages of development. Review Erikson's stages of psychosocial development, particularly those related to adolescence, middle age, and later adulthood. Outline neural, cognitive, and social changes associated with adolescence. Personality Learning objectives Outline approaches to personality assessment and discuss the reliability and	from artificial agents. – Connor Brennan (University of Pennsylvania) Human development Capstone project design Learning objectives • How do we understand how infants and children think? • Introduce Harlow's research regarding maternal deprivation and attachment in monkeys. • Introduce the characteristics of Piaget's stages of development. • Review Erikson's stages of psychosocial development, particularly those related to adolescence, middle age, and later adulthood. • Outline neural, cognitive, and social changes associated with adolescence. Personality Multivariate regression Learning objectives • Outline approaches to personality assessment and discuss the reliability and

	 Introduce each trait in the big five personality theory. Discuss trait theories of personality development. 		Bonus reading Malouff, J. M., Thorsteinsson, E. B., Schutte, N. S., Bhullar, N., & Rooke, S. E. (2010). The five-factor model of personality and relationship satisfaction of intimate partners: A meta-analysis. <i>Journal of Research in Personality</i>
8	Social behavior Learning objectives How do we perceive the self and others. Introduce the classic studies by Milgram	Interactions	Cacioppo, J. T., Hawkley, L. C., & Berntson, G. G. (2003). The anatomy of loneliness. Current directions in psychological science, 12(3), 71-74.
	and Zimbardo, and discuss the ethical implications of these studies.Introduce conformity.		Cialdini, R.B., and Goldstein, N.J. (2004). Social influence: compliance and conformity. <i>Annu Rev Psychol</i>
	 Introduce the processes associated with stereotypes, prejudice, and discrimination. Describe and give examples of empathy and altruism. 		Tamir DI, Zaki J, Mitchell JP. 2015. Informing others is associated with behavioral and neural signatures of value. <i>Exp. Psychol. Gen.</i>
			Bonus reading: Zhu, Y., Zhang, L., Fan, J., & Han, S. (2007). Neural basis of cultural influence on self- representation. <i>Neuroimage</i>
9	Persuasion	Data visualization	Falk, E., & Scholz, C. (2018). Persuasion, influence, and value: Perspectives from
	 Learning objectives Define attitudes and discuss their relationship with behavior. The role of fear and guilt in persuasion. 		communication and social neuroscience. Annual review of psychology

- Explain the foot-in-the-door phenomenon and the effect of role playing on attitudes in terms of cognitive dissonance theory.
- Neural mechanisms involved in persuasion

Berger, J. (2014). Word of mouth and interpersonal communication: A review and directions for future research. Journal of Consumer Psychology.

10 Health psychology

Learning objectives

- Discuss how stress increases the risk of disease by inhibiting the activity of the body's immune system.
- Introduce and discuss different strategies for coping with stress.
- Introduce the Integrated Model of Behavior Change and its role in health interventions.
- Self-affirmation and it's role in health promotion

Falk, E. B., O'Donnell, M. B., Cascio, C. N., Tinney, F., Kang, Y., Lieberman, M. D., Taylor, S. E., An, L., Resnicow, K., & Strecher, V. J. (2015). Self-affirmation alters the brain's response to health messages and subsequent behavior change. *Proceedings of the National Academy* of Sciences

Fishbein, M. (2008). A reasoned action approach to health promotion. *Medical Decision Making*

Bonus reading

Petty, R. E., & Cacioppo, J. T. (1986). The elaboration likelihood model of persuasion. In Communication and persuasion (pp. 1-24). Springer, New York, NY.

Van Bavel, J. J., Baicker, K., Boggio, P. S., Capraro, V., Cichocka, A., Cikara, M., ... & Willer, R. (2020). Using social and behavioural science to support COVID-19 pandemic response. *Nature human behaviour*

Trial format

Having been influenced by positive experience taking Dr. Emiy Falk's class, from day 5 onwards we will read a number of papers including 1-2 target articles for each class. Following initial deliberations in which the background readings are discussed, the target articles will be put on trial. One student will act as the prosecutor and one as the defense of each article. Each will have up to 2 minutes to present his or her case, followed by a 1-minute rebuttal to the opponent. After the initial arguments, the floor opens for team-based cross-examination, followed by jury deliberations. The jury is to decide whether the article makes a meaningful contribution to science beyond a shadow of a doubt and in relation to the other articles we have read.
